

Business Units

Turfgrass Licensing

Turfgrass Licensing is Sod Solution's core business. Our team works with research universities to develop improved turfgrass varieties and partners with key sod producers and their customers to build and promote strong, lasting brands.

Contact Christian Broucqsault for Turfgrass Licensing

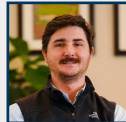

Chief Operating Officer

Software Technology

The Software Technology division provides the sales and support of fee-based software solutions to sod farms, retail sod distributors, and wholesale sod contractors. The Turf Logistics management system is the engine that drives all the software solutions within this business unit. Turf Logistics also powers our ClickSod eCommerce driven websites that allow for industry participants to sell sod and other products online.

Contact Jacob Long for Software Technology

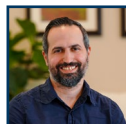

Turf Logistics Software Sales Manager

jlong@sodsolutions.com | 843-607-8765

Sod Homeowners

The primary function of Sod Homeowners is to fulfill online sales of sod, plug trays, and landscape products to homeowners via ecommerce, to provide exceptional customer service, and to equip homeowners with the knowledge and products to have an excellent home lawn experience.

Sod Professionals

Sod Solutions Pro is a new division within Sod Solutions whose primary function is to focus on large scale turf projects. The team aids general contractors, specifiers, and architects in selecting and sourcing the best grass cultivar for the given project. Sod Solutions Pro works hand in hand with our partnered farms to bring the best possible experience to the end user.
